Cocaine - Positive	2727 pg/mg
Cocaine/Metabolite - Positive	
Heroin Metabolite - Positive	3292 pg/mg
Morphine - Positive	535 pg/mg
Norcocaine - Positive	63 pg/mg
Opiate - Positive	

REPORT NOTATIONS

HairConfirm test results are anonymous and for personal use only. HairConfirm test results cannot be used in court or legal proceedings.

**In some cases, HairConfirm may be unable to detect THC despite the donor's known marijuana use. A number of factors will determine whether or not THC will bind with the hair shaft (i.e. type/purity of marijuana used/person's metabolism). If THC does not bind, and therefore does not appear in a hair follicle exam, a negative result for marijuana will be indicated.
